

PORTFOLIO OVERVIEW

Transform your laboratory into a powerhouse of productivity, efficiency, and profitability with DYNEX®

The DYNEX® Portfolio

Our fully automated line of ELISA testing instruments, accessories and consumables continue to raise the bar in laboratory optimization and efficiency. With over 8400 instruments worldwide, DYNEX® offers solutions with increasing levels of throughput to support laboratories of all sizes and specialties. Be assured that the DYNEX family of U.S. manufactured, ISO certified instruments, will remain a steady and reliable component to achieving optimal laboratory proficiency.

Our family of ELISA instruments offers your laboratory:

- ✓ Assay selections based on laboratory or clinician preference
- ✓ ELISA systems that support the simultaneous processing of multiple assays
- ✓ Reliable automation that decreases human errors and increases laboratory productivity
- ✓ Minimization of errors with barcode scanning and real-time error reporting

Experience a variety of time-saving features:

- ✓ Workflow calculator
- ✓ Automated results calculations
- ✓ Continuous sample loading
- ✓ Intuitive graphic user interface requiring minimal training

The Choice is Yours

Our ELISA open systems are vetted across multiple diagnostic testing specialties, with over 460 established protocols, spanning a variety of clinical assays worldwide. Areas of testing include:

Autoimmune

Infectious Disease

Bloodborne Pathogens

Biological and Forensic Drug

Cardiovascular and Liver

Metabolism and Fertility

Accessories and Consumables

Safeguarding Your Investment

Achieve peak performance of your DYNEX® ELISA system with accessories and consumables designed specifically to ensure precise and accurate outcomes, every time.

Developed to fulfill the highest quality standards, our accessories and consumables position your laboratory to attain heightened levels of productivity without compromise.

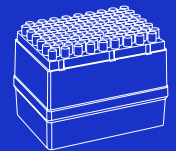

It's more than just a consumable, it's peace of mind, and part of DYNEX's continued commitment to protect the integrity of laboratory operations worldwide.

With DYNEX accessories and consumables, we guarantee:

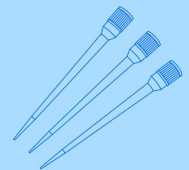

Tips are designed and manufactured with proprietary validation and quality control protocols to ensure optimal instrument performance.

All accessories are designed, tested, and verified with our instruments to provide the most reliable, accurate results, every time.

Proper fit of pipette tips facilitating reliable reagent and sample transfers to maintain test integrity and laboratory schedules.

Let us help you deliver accurate and timely results with DYNEX accessories and consumables designed specifically to achieve peak performance from your DYNEX system.

Instrument Ordering Information

Product #	Product Description
62000	DS2® System - Low Throughput Instrument
62010	DS2 System with Barcode Scanner
62700	DS2 Barcode Scanner
65100	DSX® Ambient System - Medium Throughput Instrument
65200	DSX System with 2 Incubators
65400	DSX System with 4 Incubators
65600	DSX Incubator Module
65700	DSX Sample ID Barcode Scanner Module
67000	Agility® System - High Throughput Instrument
